

## ControlNet CONFORMANCE TESTED Products

ControlNet is an independent organization for users and vendors of ControlNet products. ControlNet International manages the ControlNet Specification and supports the worldwide growth of ControlNet by developing test software, providing independent compliance testing, publishing the ControlNet product catalog and sponsoring training in design and implementation of ControlNet. ControlNet International also supports continuing technology enhancement by organizing Special Interest Groups to develop Device Profiles for specific classes of products.

ControlNet International is an open organization whose members may be user companies, vendor companies or individuals who want to use, promote or enhance ControlNet.
